

Ajoutez les fractions visuelles pour résoudre les problèmes.

Ex)

Réponses

Ex. $\frac{3}{7} + \frac{2}{7} = \frac{5}{7}$

1)

1. _____ + _____ = _____

2)

2. _____ + _____ = _____

3)

3. _____ + _____ = _____

4)

4. _____ + _____ = _____

5)

5. _____ + _____ = _____

6)

6. _____ + _____ = _____

7)

7. _____ + _____ = _____

8)

8. _____ + _____ = _____

9)

9. _____ + _____ = _____

10)

10. _____ + _____ = _____

Ajoutez les fractions visuelles pour résoudre les problèmes.

Réponses

Ex. $\frac{3}{7} + \frac{2}{7} = \frac{5}{7}$

1. $\frac{4}{6} + \frac{1}{6} = \frac{5}{6}$

2. $\frac{7}{12} + \frac{1}{12} = \frac{8}{12}$

3. $\frac{6}{8} + \frac{1}{8} = \frac{7}{8}$

4. $\frac{1}{3} + \frac{1}{3} = \frac{2}{3}$

5. $\frac{2}{4} + \frac{1}{4} = \frac{3}{4}$

6. $\frac{1}{12} + \frac{9}{12} = \frac{10}{12}$

7. $\frac{3}{5} + \frac{1}{5} = \frac{4}{5}$

8. $\frac{1}{10} + \frac{7}{10} = \frac{8}{10}$

9. $\frac{4}{8} + \frac{1}{8} = \frac{5}{8}$

10. $\frac{1}{6} + \frac{3}{6} = \frac{4}{6}$
